Редкие виды насекомых

Rare insect species

The background of the slide is a photograph of a serene landscape. In the foreground, there are tall, thin, golden-brown grasses growing out of dark, rocky soil. Beyond them is a calm lake with a few dark rocks scattered across its surface. The middle ground shows a range of hills and mountains covered in dense green and yellowish forests. The sky above is a clear, pale blue with a few wispy white clouds.
